

Joaquín Mussi

Full Stack Web Developer

24/02/2002

PRESENTATION

I'm passionate for technology, actually working in the La Mutual de AMR as Frontend Developer. I'm a proactive person and I have personal treatment skills and team work. I love programming and I have technical knowledge, always focused on efficiency and solving problems with great capacity for work under pressure.

IT EXPERIENCE

La Mutual de AMR /JUNE 2022 – NOW

FullStack Web Developer

I work with ChakraUI and SASS for styles, adapting the web to different devices, I'm charge of connecting the backend with the frontend. I'm participating in the backend by creating APIs.

I use Postman for test endpoints. I modify old code made in CSHTML (HMTL IN C#) and then migrate it to NextJs. I test components with Jest and I always respect the principles of solid and clean code allowing its reuse. I apply SCRUM for agile and efficient work (JIRA), CI/CD and Gitlab. Contact:

Internship at Hotel Costa Azul/DECEMBER
2020 – JANUARY 2021

Python Developer

My job was to participate in the development of an application. Tasks performed: simple login, store in a dictionary 2 previously registered users, creation of two modules that can be accessed depending on the type of privilege either manager or reception.
